1. The drawings are objected to because the text in fig. 2-10 should be in English. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The following is an examiner's statement of reasons for allowance: the examiner found no teaching in the prior art that would render obvious the claimed method for real-time navigation using three-carrier radio signals of first, second and third different frequencies that increase in value from the first to the third carrier frequency, to determine the position of a rover station including the steps of "estimating, in said rover, a wide lane ambiguity of the phase differences between first and second carriers, from said extra-wide lane ambiguity; determining, in said rover, ambiguity resolution of one of

the carrier frequencies from said wide lane ambiguity; and applying real-time ionospheric corrections during the resolving step, said ionospheric corrections being based on a continuously updated real-time ionospheric model of said ionospheric layer”.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dao L. Phan whose telephone number is (571)272-6976. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Tarcza can be reached on (571)272-6979. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
